

DIEGO PARTIDA ROMERO

Full Stack Developer | Next.js · TypeScript · Node.js

+52 33 2425 2048 diegopartidaromero@gmail.com in /in/diegopartidaromero diegopartidar.com diegopartida22

Guadalajara, México · Remote (CST)

Full stack developer with 2+ years shipping production SaaS for fintech, real estate and manufacturing clients. **Next.js + TypeScript** front ends backed by **Node.js** services, with hands-on experience in Mexican electronic invoicing (**CFDI 4.0 / SAT**), payment rails (**SPEI / STP**), ERP integrations and financial APIs.

PROFESSIONAL EXPERIENCE

Eqidis Oct 2025 – Present
Full Stack Developer

- Core developer of a multi-tenant SaaS accounting and electronic invoicing platform (**CFDI 4.0**) for Mexican SMBs, built with **Next.js 15, TypeScript, Tailwind CSS, shadcn/ui** and **Node.js**.
- Owned the invoicing engine end to end — issuance, cancellations and complementos — integrating directly with **SAT** for real-time tax compliance.
- Built subscription and plan management plus financial dashboards, and a PDF-to-Excel bank statement converter that cut manual reconciliation work by **~70%**.

GraxiHome Nov 2025 – Present
Full Stack Developer

- Building a real estate self-financing (proptech) platform with **Next.js, TypeScript, Tailwind CSS** and **AWS**, covering the full journey from application to signed contract.
- Implemented the payment infrastructure end to end, integrating **STP** for **SPEI** transfers and **Synergy** for cash deposits, so every client payment is captured automatically without manual entry.
- Payments reconcile in real time against each client's financing plan, updating balances across the client portal, the admin dashboard and the underlying contract.
- Integrated **Odoo** as backend ERP via REST and **WeeTrust** for digital contract signing and trust (fideicomiso) management.

RenoPartes Dec 2025 – Present
Freelance Full Stack Developer

- Sole developer of the operations platform that tracks every part end to end — parcel intake, lab diagnosis, rebuild, quoting, picking and packaging QC — across **5 departments**, replacing paper and spreadsheet workflows.
- Modeled the part lifecycle as an auditable **state machine** over **Oracle**, covering inventory movements, warranty rulings, serial-number traceability and a per-user change history; **2,000+** case files in production.
- Built the full stack with **Next.js, TypeScript** and **NestJS**, including production schema migrations and QA-driven fixes to revenue-critical billing logic.

iDrall Feb 2024 – Sep 2025
Full Stack Developer

- Led UI development for ERP and CRM modules using **React, Next.js, TypeScript** and **Tailwind CSS**, improving Largest Contentful Paint by **~40%**.
- Integrated RESTful micro-service APIs enabling real-time data refresh, reducing manual refresh actions by **80%**.

ACADEMIC

Tec de Monterrey (ITESM)
B.Sc. Computational Eng. Science
Aug 2021 – June 2025
GPA: 97/100 · Academic Talent Scholarship
